

# Georgia Tech Living Learning Center

## QUICK FACTS

Atlanta, GA / 3,074 SF / 2017

### PROJECT DETAILS

- Project entailed renovating a convenience mart into a flexible learning space
- Flex space can scale up to a large meeting or training area or down into subdivided learning or meeting rooms.
- Lighting, A/V, and acoustics integration all were key to the project's success

### AWARDS

ASID Georgia Bronze design award in Education

### SERVICES PERFORMED:

Interior design services including space planning, material and finish selection, acoustics, furniture coordination, construction administration

“The Living Learning Community West Commons is designed for Georgia Tech Living Learning Communities' classes, events, and co-curricular activities. A critical success factor for LLCs, it is flexible space that combines academic, co-curricular, and living space for first year students.”
